

Reports

An abundance of data is available within the MIDAS+ JRepository solution, allowing your organization to manage progress toward standards compliance. The Reports module puts all this information at your fingertips with more than 30 on-demand report generators. This module includes a variety of options to customize data views.

Reports related to administrative functions, assessment outcomes, corrective action plans, events, competencies, and the resource library are all available and customizable.

MIDAS+ JRepository provides the necessary tools for your organization to analyze performance metrics and make informed decisions, so you can improve processes across multiple disciplines.

Features & Benefits

- Produce reports on demand with any of more than 30 report generators
- Customize reports with a variety of options
- Administrative reports provide information related to solution users, workgroups, security roles, and permissions
- Assessment reports provide information related to various assessments, comparable reports between assessments, specific assessment metrics, and tracer template reports
- Corrective Action Plan reports provide information for status, detail, listing, and summary information related to Corrective Action Plans
- Event reports provide information such as event status and detail, as well as metrics related to intake reports
- Library reports provide information related to the document repository, custom forms, and the organizational contact list
