

Continuing Medical Education (CME) and Committees

With Continuing Medical Education (CME) and Committees functionality in MIDAS+ Seeker, you have a comprehensive package for tracking providers' external and internal CME activities and attendance and current committee/department membership and attendance.

CME activities help ensure that healthcare providers maintain a level of clinical competence in their practice of medicine. Use CME in MIDAS+ Seeker to track CME activities external to your organization as part of the credentialing process and to coordinate and provide CME activities within your organization for accreditation from the American Council of Continuing Medical Education (ACCME).

Committee and service or department participation is often used as an evaluator for continued medical staff membership. Use the Committee Roster and Attendance functions in MIDAS+ Seeker to track current committee/department roster membership, maintain a historical archive of membership, schedule recurring meetings, and track meeting notifications, RSVPs, and attendance, as well as stipend payments to medical staff leaders.

Features and Benefits

- Track CME items such as course title, objective, course type, date, time, location and fee information, as well as category and credit by attendee, sponsor information, organization, and physician vs. non-physician attendees
- Use CME to manage multiple meetings on the same day
- Use Committee Roster functionality to track roster data such as committee and department name by organization, organization staff membership, membership dates, type of membership, and stipend information, including frequency of payments and dates paid
- Use Committee Attendance functionality to record meeting notification and attendance information for providers, organization staff, and guests
- Schedule recurring meetings (daily, weekly, monthly, or yearly) for CME and Committee activities
- Calendar Viewer function provides users with a daily, weekly, or monthly view of all CME and Committee activities, and calendars can be exported to HTML for posting on an organization's intranet
- Use Standard Reports to easily generate summaries of CME and Committee activities for a specific date range, view detailed attendance information for specific providers for a specific date range, or generate a sign-in sheet for committee meetings

Use Scheduler functionality in CME and Committees to easily set up or modify future meeting information. With the Calendar Viewer, users throughout your organization can view scheduled events for CME courses, committee meetings, or both. Events are displayed by month, week, or day. You can view scheduled recurring meetings and produce a monthly, weekly, or daily calendar that can be printed or exported to HTML format.
