

Graduate Medical Education (GME)

With Graduate Medical Education (GME) functionality in MIDAS+ Seeker, academic institutions and sponsoring organizations have a comprehensive automated system for tracking providers' post-graduate training programs.

Use MIDAS+ Seeker to manage all aspects of the GME process, including monitoring and evaluating the educational process and the providers' level of ability to provide quality, competent patient care while under the supervision of an instructor.

Features and Benefits

- Monitor providers' activities associated with multiple GME programs from beginning to end.
- Create user-defined fields to supplement the data collection process
- Implement a paperless tracking system
- Link electronic documents, including photos and other images, to the provider record
- Record expected and actual graduation dates
- Track multiple rotations with start date, end date, rotation type, program year, specialty, location, and supervising physician
- Track funding sources with percent of funding from each source, contract acknowledgments, and moonlighting acknowledgments
- Record program levels with corresponding salaries
- Track evaluations and monitoring events
- Generate letters and other documents directly from the GME provider's record
- Use GME-focused Standard Reports to generate Current Provider Listing reports, Evaluations reports, and Expirations reports.

MIDAS+ Seeker seamlessly integrates Graduate Medical Education functionality with other provider-specific functions, making it easy for you to track evaluation information, funding sources and acknowledgments, as well as details about specific rotations.
