

ReporTrack™

The proprietary MIDAS+ ReporTrack tool is an easy-to-use, full-featured report writer built into the MIDAS+ product. You can use it to create your own custom reports without extensive knowledge of database concepts. Use ReporTrack by itself or in conjunction with third-party SQL reporting tools. With ReporTrack, you have complete control over your reporting tasks.

Features and Benefits

- An intuitive, graphical interface contained within MIDAS+ Care Management and MIDAS+ Seeker
- Sophisticated reports without leaving MIDAS+ for a third-party application
- Easy selection of MIDAS+ modules and Dictionaries as data sources
- Selection criteria allow you to restrict the scope of data returned by a report according to parameters you specify
- Ability to use Indicators as selection criteria provides seamless integration with SmarTrack reporting
- Tabular listing and worksheet-style reports
- Format painter allows you to copy and paste styles from field to field
- Automatic detection and correction of unwanted duplication
- Automatic data structure linking and visual tools for manual linking
- Custom formatting, including formatting data fields and field labels with custom fonts, colors and styles, adding running headers and footers, modifying the overall page layout, and grouping and ordering data
- Output to screen, printer, file, Microsoft® Excel, or HTML
- Standard and "Web-ready" HTML preview modes
- Compatibility with existing SQL technologies, such as Business Objects® Crystal Reports® and Microsoft Access
- User-defined formulas allow you to make calculations from field data and can be used as selection criteria
- Ability to import and export reports allows you to archive and restore reports, or share report templates with other facilities
- Special fields allow you to select information, such as the report title or print date, for display on your reports
- Built-in links to previous and subsequent encounter information for readmission reporting
- Formula library allows you to build a formula once and re-use it in multiple reports
